Summary

Software engineer with hands-on experience across the full development lifecycle, including web application development, integration testing, and deployment. Proficient in multiple programming languages and frameworks, with experience building full-stack applications and data-driven systems across enterprise environments. Seeking to leverage my technical skills and problem-solving abilities in a challenging software role.

Technical Skills

Programming Languages: C, C++, C#, Java, TypeScript, JavaScript, Python, SQL, HTML, CSS

Frameworks & Tools: .NET/.NET Core, Angular, FastAPI, Next.js, React, Tailwind CSS, Node.js, Express.js, SQL Server, SQLite, Linux, Unix

Project & Development Tools: Git, GitHub, Bitbucket, Azure DevOps, Jira, Confluence, GitHub Copilot

Experience

State Farm

Atlanta, GA

Underwriting Service Assistant

06/2024 - Present

- Review and evaluate 70–80+ applications in ConnecZ using rule-based decision logic, assessing risk factors to determine premium eligibility.
- Streamline application workflows by identifying and addressing inefficiencies, reducing turnaround time and improving assessment accuracy.
- Analyze and process insurance applications to ensure compliance with established underwriting guidelines.
- Guided teammates through complex workflows and decision logic using structured frameworks, contributing to measurable performance improvements and ensuring team readiness.

Randstad USA

Atlanta, GA

Underwriter Associate

01/2024 - 06/2024

- Analyzed new business, renewal, and endorsement accounts to ensure compliance with State Farm guidelines.
- Developed and maintained Excel reports to track operational data and streamline team workflows.

Docufree Corporation

Alpharetta, GA

Software Engineer

01/2023 - 09/2023

- Developed and deployed a C# application to transform and streamline Excel data processing, improving data organization and usability.
- Employed C#, .NET/.NET Core, and supporting technologies to perform integration testing and debugging, resolving complex technical challenges prior to deployment.
- Managed the full software development lifecycle including development, testing, deployment, and subsequent fixes and enhancements.

Georgia Department of Revenue

Atlanta, GA

Software Developer

06/2022 - 09/2022

- Improved web applications using VB.NET and XML, enhancing system functionality and resolving complex technical issues.
- Conducted troubleshooting and provided technical documentation to support application stability.

Southern Automation, Logistics & Technology (SALT)

Statesboro, GA

Software Developer

08/2021 - 12/2021

- Developed and maintained web applications using C#, JavaScript, and HTML, supporting updates and deployments through Azure DevOps.
- Leveraged .NET/.NET Core to deploy object-oriented code, test web applications, and participate in design and code reviews.
- Designed and maintained SQL scripts and stored procedures to support data management across production, test, and development environments.

Education

Georgia Southern University

Graduated 05/2022

Bachelor of Science in Computer Engineering

Certifications

SAP Technology Consultant Certificate (2025)

SAP/Coursera

Projects

Risk Assessment App

- Developed a full-stack risk assessment application using FastAPI, Next.js, TypeScript, Python, and SQLite to analyze U.S. ZIP code data and generate risk scores and recommendations.
- Integrated multiple external APIs to aggregate weather, disaster, crime, and population data for risk scoring.
- Designed a weighted scoring engine to normalize and combine disparate data sources into categorized risk levels.
- Built RESTful API endpoints with assessment history storage, search/filter capabilities, and a responsive Tailwind CSS frontend.

Cat Modeling Agency App

- Designed a web application for a fictional cat modeling agency with a Tailwind CSS frontend and an Express.js backend to manage cat profiles, bookings, and performance metrics stored in a local JSON file.
- Implemented backend logic to create and manage cat attributes (name, breed, age, availability, etc.)
- Developed RESTful API endpoints (GET, POST, PATCH) and tested backend functionality using PowerShell curl commands.
- Transformed the project into a multi-page, agency-style web application by redesigning the UI, improving navigation, and expanding booking and contact workflows to enhance the overall user experience.

Goal Tracking App

- Built a goal-tracking web application in Angular that allows users to add, complete, and delete goals.
- Styled a clean, responsive UI using Angular components, TypeScript, and CSS.
- Used Angular CLI, VS Code, and GitHub Copilot for scaffolding, debugging, and rapid iteration.

Light Accessibility Drone

- Designed a drone using facial recognition and electromyography (EMG) to detect gestures and transport small objects.
- Developed a C program to translate gestures into executable drone commands.
