Experience

State Farm

Atlanta, GA

Underwriting Service Assistant

06/2024 - Present

- Review and process applications and policy changes according to established guidelines.
- Provide strong customer service by processing new business and existing policy entries accurately and timely.
- Perform premium breakdowns and calculate rates based on selected coverages.
- Assist with inquiries from agents, their team members, and policyholders.

Randstad USA

Atlanta, GA

Underwriter Associate

01/2024 - 06/2024

- Managed administrative duties for new, renewal, and endorsement accounts for State Farm.
- Reviewed and evaluated insurance policies, calculating rates on applications in accordance with State Farm guidelines.
- Supported team members with administering policy cancellations.

Docufree Corporation

Alpharetta, GA

Software Engineer

01/2023 - 09/2023

- Developed and deployed a C# application to streamline Excel data processing, enhancing usability and efficiency.
- Led integration testing and provided ongoing support for software applications, ensuring operational stability.

Georgia Department of Revenue

Atlanta, GA

Software Developer

06/2022 - 09/2022

- Improved web applications using VB.NET and XML, contributing to enhanced system functionality.
- Conducted troubleshooting and provided documentation to resolve complex technical issues.

Southern Automation, Logistics & Technology (SALT)

Statesboro, GA

Software Developer

08/2021 - 12/2021

- Developed and maintained web applications using C#, JavaScript, and HTML, utilizing CI/CD pipelines to streamline updates and deployments.
- Collaborated with a development team to implement data management strategies and meet project deadlines.

Education

Georgia Southern University

Graduated 05/2022

Bachelor of Science in Computer Engineering

Certifications

SAP Technology Consultant Certificate (2025)

SAP/Coursera

Projects

Light Accessibility Drone – Senior Project

- Designed a drone using facial recognition to transport small objects, integrating electromyography for gesture recognition.
- Developed a C program to interpret gestures into executable commands for the drone.

Autonomous Four-Wheeled Robot

- Engineered a robot equipped with infrared sensors for obstacle detection, employing C programming for operational functionality.
- Collaborated with a team to optimize algorithms for enhanced automation and efficiency.
